

Wherever you go...

HFI-15G

Short description

Open, supra-aural headphones
Technologies:
S-Logic™ Natural Surround Sound
Safer hearing

Technical specifications

S-Logic™ Natural Surround Sound
Dynamic principle; open
Frequency range 20-20.000 Hz
Impedance 32 Ohm
Sound pressure level 96 dB
Driver 40 mm Mylar
Weight 85 g (without cord)
Cord length ca 1 m with gold-plated jack, 3,5mm incl. 3,5/6,3mm adaptor and extension cable (ca 4m)
Long-term availability of spare parts

Character

These lightweight headphones can follow you easily. You barely feel it when you wear them. The open-back design of the HFI-15G is highly appreciated for mobile applications or as hearing aid for watching TV. This is the smallest headphone of the Ultrasone HFI line, convincing with its pure and spacious sound.

S-Logic™ Natural Surround Sound

Through the S-Logic™ Natural Surround Sound the usual headphone sound will be moved out of the head in the room around you. The sound is no longer locked in, but appears broad and detached. Directions and distances can be heard and perceived - it's just like being in a live concert. For this new technology additional equipment is not required. Take a pair of Ultrasone headphones plus your sound device and you will be ready for the 3-dimensional sound enjoyment!

Safer hearing

S-Logic™ does not only create a Natural Surround Sound. S-Logic™ allows at the same time a reduction of sound pressure levels by up to 40% (3-4 dB) for the same loudness sensation. This may reduce the risk of hearing damage while ensuring hours of fatigue-free listening. However, Ultrasone generally advises not to listen to music at high volumes to prevent hearing damage.
